

ELVA combines what the market keeps separate: professional MT5 execution, stablecoin funding, copy and bot trading, and an AI that explains its reasoning — governed by a deterministic risk engine the AI cannot override, under one transparent view of where every dirham of capital sits. Built in Dubai for the Gulf's best-funded retail traders.

EVERY SCREEN ANSWERS FOUR QUESTIONS

Where is my capital?

Six explicit states, never one ambiguous balance. Unallocated funds are unreachable by AI and bots — by architecture.

What does ELVA see?

AI analysis with its counter-case and kill-conditions attached. Confidence means setup confidence — never odds of profit.

Why does it matter?

A separate deterministic risk engine checks every automated action. If it goes down, automation fails closed.

What are my boundaries?

Limits, permissions and a kill switch the user controls. A bot can trade; a bot can never withdraw.

THE MARKET — THE GULF IS WHERE RETAIL TRADING PAYS

800k+

active FX traders, UAE + KSA + Qatar (industry est.)

+34%

GCC retail account growth, year-on-year 2025

\$1.2–2.5k

UAE average first deposit — world's highest tier

24.4%

of UAE adults own crypto — 2nd globally

TWO-STAGE ECONOMICS — CAPITAL BUYS EVIDENCE BEFORE IT BUYS REGULATION

STAGE 1

Partner's licence

\$168

lifetime revenue per client as an introducer. Thin by design — its only job is proving retention.

STAGE 2

Own DFSA / FSRA licence

\$616

per client at full spread — a 3.7x step-up on the same customer base.

Why no ads: a click costs \$36–47 in the UAE against \$168 stage-1 value. Growth is partners, platform listings and owning "AI trading" search early.

71% of accounts lose money industry-wide; assisted platforms run ~51%.

THE PLAN — THREE PHASES, EACH BEHIND A GATE

0 PROVE · NOW–3 MO

Demo platform (built, live today) · waitlist · UAE counsel engaged · partner-broker LOI.

Gate: memo + partner + 1k waitlist

1 EARN · 3–9 MO

Real money on a licensed partner's rails. Manual + user bots only; AI analysis-only; no custody; geofenced.

Gate: 1–2k clients, retention above the 7-month norm

2 OWN · 9–24 MO

Own free-zone licence (eToro's ADGM permission is the precedent). Full spread; copy trading under proper permission; Autopilot later, separately approved.

Outcome: a licensed, differentiated UAE broker

See it, don't take our word for it

Live prototype: ved9871.github.io/Elva-markets

Landing page, client app, AI decision flows, capital layer and operations console — fully interactive. Try "Demo states" in the app to watch the platform fail safely on purpose.
